PREFERRED MEDICATION LIST

OCTOBER 2009

SELECT

Your prescription drug benefit includes a list of medications called a formulary. Doctors and pharmacists dedicated to providing patients with high-quality, cost-effective prescription drug therapy reviewed and approved this formulary. All medications were selected after considering safety, effectiveness, uniqueness and cost.

Medications on this list are formulary drugs. Drugs not listed are non-formulary (NF). **Coverage of formulary and NF drugs is subject to your plan's benefit design.** Formulary brand drugs sold by a repackager will require a non-formulary copay. Generic drugs are listed in lower-case; brand drugs are in capital letters.

Please show this formulary to your doctor each time a prescription is written and remember to ask "Is there a generic medication that is right for me?" To encourage the use of generic drugs, brand formulary drugs usually become NF after a generic version becomes available.

DR Delayed-release
ER Extended-release
